

# Michael Ng Cen

New York, NY | [michaelngcen@yahoo.com](mailto:michaelngcen@yahoo.com) | [LinkedIn](#) | [Github](#) | [Portfolio](#)

## SKILLS

---

Javascript, React, Redux, Ruby, Ruby on Rails, jQuery, SQL, HTML5, CSS3, Node.js, Express, MongoDB, Mongoose, AWS, Git, GitHub, Microsoft Suite (Word, Excel, PowerPoint), Spanish, Cantonese

---

## PROJECTS

---

**Twicify** (Ruby on Rails, React, Redux, and AWS)

[Live](#) | [Github](#)

*Full stack clone of Spotify where logged-in users can listen to music, create/delete/like playlists*

- Employed Ruby on Rails to implement CRUD operations using the MVC (Model-View-Controller) framework, and created RESTful API routes to interact with the React frontend
- Utilized React's lifecycle methods and Redux to manage application state and make AJAX requests
- Designed and built frontend React components to provide users with forms to create, edit and delete playlists.
- Leveraged AWS3 media storage and Rails Active Storage to store images and allow users to upload their own pictures for the playlist

**Task-It** (MongoDB, Express, React, Redux, Node.js, Socket.io)

[Live](#) | [Github](#)

*Project management tool web application that allows users to create projects and tasks for their teams, interact with team members through a live chat, and visualize individual project status*

- Contributed to team success by attending daily standup meetings and utilizing Git workflow.
- Utilized design expertise to create and design the web application's logo.
- Developed and designed landing and splash pages

**MapleTales** (Javascript, HTML, and CSS)

[Live](#) | [Github](#)

*Single-page web application built where users can control a character with a keyboard*

- Implemented object-oriented programming to create and design classes for DRY development
- Utilized Javascript event listeners and query selectors to dynamically track and update the character to indicate where to move or what action to do
- Constructed a beautiful splash and instruction by using pseudo-class selectors to optimize the user experience

**KITO** (Javascript, HTML, and CSS)

[Live](#) | [Github](#)

*Single-page web application built where users can search for anime using Jikan API*

- Scripted a program using the Jikan API to search and fetch anime data based on user search queries
- Implemented event listeners to handle page loads and form submissions with ease
- Created a beautiful and responsive splash page optimized for all devices of any size

## EXPERIENCE

---

**Ngcen LLC**

**Bronx, NY**

*Owner*

June 2020 - Present

- Developed and managed the company website, optimizing SEO and branding to increase online presence.
- Negotiated favorable pricing for inventory purchases by building relationships, and analyzing trends.

**Uniqlo**

**New York, NY**

*Sales Associate*

October 2018 - April 2020

- Recorded and analyzed goals trends to generate a top 10 list.
- Mitigated profit losses by determining which items needed to be sold.

## EDUCATION & CERTIFICATIONS

---

**App Academy** - In-Person 1000+ Hour Immersive Full-Stack Web Development Course

September 2022

**Queens College** - Bachelor of Arts in Economics

June 2022

**Harvard Business School Online** - Certificate in "Leading with Finance"

December 2020
